

Automation Opportunities

Prepared by: Saad Hassan

Internship: AI Automation Internship

Company Name: Petalnex Private Limited

Process 1

Process Name: Employee Leave Approval

Current Manual Process:

Employees email HR for leave. HR checks leave balance, seeks manager approval, updates records, and informs the employee manually.

Problem

Time-consuming, delays, and paperwork.

Trigger

Employee submits leave request.

Input

Employee ID, leave dates, leave reason.

Processing Required

- Validate employee
- Check leave balance
- Send approval request
- Update leave records

Expected Output

Approved/rejected leave notification.

Benefits

- Faster approval
 - Reduced paperwork
 - Accurate records
 - Improved efficiency
-

Process 2

Process Name

Customer Support Ticket Handling

Current Manual Process

Support staff manually read emails, categorize issues, assign tickets, and reply to customers.

Problem

Slow response times and inconsistent ticket assignment.

Trigger

Customer submits support request.

Input

Customer name, email, issue description.

Processing Required

- Categorize issue
- Assign priority
- Notify support team
- Send acknowledgment email

Expected Output

Support ticket created and customer notified.

Benefits

- Faster response
 - Better customer satisfaction
 - Reduced manual work
-

Process 3

Process Name

Invoice Generation

Current Manual Process

Finance staff manually prepare invoices from order details and email them to customers.

Problem

Human errors and delayed billing.

Trigger

Order completed.

Input

Customer details, order items, payment information.

Processing Required

- Generate invoice
- Calculate tax
- Create PDF
- Email invoice

Expected Output

Invoice delivered to customer.

Benefits

- Faster billing
- Reduced errors

- Improved record keeping
-

Process 4

Process Name

Social Media Post Scheduling

Current Manual Process

Marketing team uploads posts individually on multiple platforms.

Problem

Repetitive work and inconsistent posting schedule.

Trigger

New marketing content approved.

Input

Post content, images, schedule time.

Processing Required

- Format content
- Schedule posts
- Publish automatically

Expected Output

Post published on selected platforms.

Benefits

- Time saving
 - Consistent marketing
 - Better audience engagement
-

Process 5

Process Name

Daily Sales Report Generation

Current Manual Process

Employees collect sales data from multiple systems and prepare reports manually.

Problem

Takes hours every day.

Trigger

End of business day.

Input

Sales database records.

Processing Required

- Collect data
- Calculate totals
- Generate charts
- Email report to management

Expected Output

Daily sales report.

Benefits

- Instant reporting
- Better decision making
- Reduced manual effort
- Higher accuracy
